## Reese Pharmaceutical Offers Guaifenesin Line Extensions with APAP for Pain and Fever

---

CLEVELAND, OHIO, February 1, 2008—Continuing to expand its Guaifenesin-based cough/cold line, Reese Pharmaceutical Company now offers two new combination formulas containing acetaminophen for pain and fever relief. These unique, proprietary (non-generic) formulations are logical line extensions since many cold sufferers also experience aches, pains, and fever. Non-drowsy and dye free, they are currently available in Reese's Refenesen™ brand as well as private label.

***Refenesen™ Chest Congestion & Pain Relief***, containing 400mg Guaifenesin and 650mg APAP, relieves chest congestion, thins and loosens mucus, relieves headache, pain and reduces fever.

***Refenesen™ Chest Congestion & Pain Relief PE***, containing 400mg Guaifenesin, 10mg Phenylephrine HCl, 650mg APAP, relieves chest and sinus congestion, thins and loosens mucus, relieves headache, pain and reduces fever.

In addition to these items, Reese markets several other Guaifenesin-based cold relief products that are cost-effective alternatives to other high demand products currently on the market.

Founded in 1907, Reese Pharmaceutical Company is a privately held manufacturer of niche OTC drugs offered in their own brand and as private label. Visit our web site at [www.ReesePharmaceutical.com](http://www.ReesePharmaceutical.com) for further information.
